## Experience

---

### Clarifai

#### Machine Learning Developer Advocate | 05/2023 - Present

- Grew Clarifai's social media presence from 7K followers with less than 3K+ impressions a month to 11K+ followers and generating over 1M+ impressions.
- Created 15+ YouTube videos, including tutorials and product demos, accumulating over 30K+ views.
- Built and nurtured the Clarifai developer community on Discord, achieving 1,000+ active members.
- Represented Clarifai at 4 hackathons with over 3,000 registrants, managing all aspects from establishing objectives to providing guidance throughout the events and reviewing submissions.
- Authored the Developer Newsletter, sharing tutorials, new AI models, and AI tips with 15K+ developers weekly.
- Created posts and demos on building AI Apps with LLMs and shared them on my personal X(Twitter) of 50K+ Community, generating over 1M+ impressions.
- Built Streamlit modules using LLMs and other newly integrated vision and audio models within the Clarifai Community.
- Collaborated with the Product team on monthly releases, participating in early testing, sharing feedback, and contributing to release emails and blogs.
- Worked closely with the Docs team to share user feedback and consistently update the documentation.
- Partnered with the Sales team to build effective demos and UI modules for customer presentations.

### Steamship

#### NLP Package Developer and Developer Advocate | 12/2022 - 04/2023

- Developed open-source packages and plugins for various NLP applications.
- As an early member of the team, strategized Developer Relations by creating and distributing content.
- Created resources such as demos, code samples, and guides to support application development.
- Organized Twitter (X) Spaces to enhance product awareness and user engagement.

### One AI

#### Developer Advocate | 07/2022 - 11/2022

- Took end-to-end responsibility for creating content on Social Media and developing Product Videos.
- Boosted Discord Community by 200+ through targeted initiatives.

### Omdena India Chapter

#### Machine Learning Collaborator | 04/2022 - 06/2022

- Led the Data Preprocessing team, analyzed and cleaned raw data using Pandas, Numpy, and Scikit-learn.
- Developed a text-based healthcare chatbot to support admitted hospital patients and performed sentiment analysis on tweets related to medical information using NLTK and spaCy.
- Deployed the model using Flask and AWS for real-time interaction and monitoring.

### Neolen Technologies

#### Machine Learning Intern | 09/2021 - 12/2021

- Took ownership of a Project - Background Removal of a Video using Mobilenetv2 and Resnet and delivered the Project to the client in 1 month.
- Developed and maintained Machine Learning models for a Sports App using Clustering algorithms.
- Developed a Machine Learning Model that predicts Customer Satisfaction based on the product reviews.

## Skills

---

Python, Machine Learning, GenAI, MLOps, SQL, RAG, LLM Fine-tuning, Prompt Engineering, Social Media Management, Community Building, Content Creation, Customer Support

## Education

---

Panimalar Engineering College | Chennai, India

Electronics and Communication Engineering | 06/2022

Graduated with a CGPA of 9.25
